ISTQB Certified Tester – Foundation Level v4.0 (English, CTFL) (CTFL-EN)

The course is an accredited training designed to prepare for the ISTQB® Certified Tester – Foundation Level exam. The course gives an understanding of typical activities, methods and techniques for software testing. The participants impart knowledge of the foundations of the test process: planning, designing, executing and reporting software tests. The training gives the participants an overview ranging from unit testing to system and acceptance testing and how test tools and test management tools can support these activities.

INHALTE

- Fundamentals of Testing
- Testing Throughout the Software Development Lifecycle
- Static Testing
- Test Analysis and Design
- Managing the Test Activities
