

MS Excel – Basics in English (EXCELBASICS)

This hands-on oriented course will familiarize you with the basic handling of Microsoft Excel. You will learn to make calculations using simple formulas and functions and visualize business data with charts. We will cover efficient table design, the new sparkline features and printing. The course also contains an introduction of some often-used advanced techniques, like sorting data and conditional formatting. And of course, we will take a closer look on the newly introduced features of the latest Excel version.
